NTISearch

NTISearches are fully annotated bibliographies that are prepared by information specialists at NTIS from its on-line interactive bibliographic retrieval system comprising almost 600,000 document/data records. NTISearches are of two kinds: Published Searches and On-Line Searches. Published Searches are prepared by NTIS analysts in anticipation of users' needs. Also available are Published Searches prepared from the Engineering Index and the American Petroleum Institute data bases. On-Line Searches are prepared by these same analysts on a customized basis to satisfy a very specific user information need. This is a listing of currently available Published Searches with ordering information and other relevant data on NTIS products and services.

AVAILABLE PUBLISHED SEARCHES

This brochure presents three lists of Published Searches:

- A subject category index which arranges these Published Searches into the categories shown below (Starts on page i-1)
- A subject index (Starts on page j-1)
- A NTIS order number list (Starts on page k-1)

The citations in these listings include the following information:

NTIS/PS-76/0146/3GBP
Band Pass Filters (139) Feb 76
NTIS/PS-76/0146/1GBP
Band Pass Filters (154) 1974-1975 (*Ei*)

- + Order Number (Please use when ordering any information item)
- + Title
- + Number of citations (in parentheses) in the search
- + Date of preparation or coverage of the search
- + Whether the Published Search was prepared from the Engineering Index (Ei) or the American Petroleum Institute (API) data bases.

Published Searches are updated at regular intervals and are available in paper copy or microfiche at a cost of $25 each for addresses in the North American Continent ($35 for all others) whether in paper copy or microfiche.

ABOUT NTISEARCHES

Published Searches are bibliographies developed by information specialists at NTIS from an on-line interactive bibliographic information retrieval system in order to meet anticipated users' needs. Although most of the Published Searches are prepared from the NTIS data base, some are prepared from the Engineering Index, Inc. (Ei) and the American Petroleum Institute (API) data bases.

Published Searches are updated at regular intervals and are available in paper copy or microfiche at a cost of $25 each for addresses within the North American Continent ($35 for all others) whether in paper copy or microfiche. Additional copies of the same Published Search to the same address cost $10 each for addresses within the North American Continent ($12.50 each for all others) in paper copy or microfiche. A complete list of Published Searches is printed in this brochure.

On-Line Searches of the NTIS data base are also available. Should a Published Search prepared from the NTIS data base not fully satisfy your particular information needs, you may wish to obtain a specially prepared NTIS On-Line Search. You may return your NTIS Published Search to NTIS for full credit toward the purchase of an NTIS On-Line Search. Simply call the On-Line Search telephone number (703) 557-4642 to make arrangements with an NTIS Information Specialist and to discuss directly your specific information needs. The costs of a customized NTIS On-Line Search are as follows:

	North American Continent*
Up to 100 technical report summaries	$100
101 to 200 technical report summaries	125
201 to 300 technical report summaries	150
301 to 400 technical report summaries	175
401 to 500 technical report summaries	200
More than 500 technical report summaries	Negotiated

ABOUT NTIS

The National Technical Information Service of the U. S. Department of Commerce is the central source for the public sale of Government sponsored research, development and engineering reports and other analyses prepared by Federal agencies, their contractors or grantees. It is also a central source for Federally generated machine processable data files.

NTIS ships 19,000 information products daily as one of the world's leading processors of specialty information. It supplies the public with approximately four million documents and microforms annually. The NTIS information collection exceeds 900,000 titles. Most are available for sale. About 105,000 titles are in current shelf stock.

NTIS is obligated by Title 15 of the U. S. Code to recover its costs from sales. The distribution of its information products and services is self-sustaining.

Timely and continuous reporting to subscribers is ensured by agreements between NTIS and several hundreds of Federal research sponsoring organizations. NTIS is the marketing coordinator for the latter, for their publications, technical inquiries and special analyses.

The public may quickly locate summaries of interest from among 500,000 Federally sponsored research reports completed from 1964 to date, using the agency's NTISearch program which comprises custom On-Line Searches and prepackaged bibliographies called Published Searches.

The NTIS Bibliographic Data File on magnetic tape, which includes published and nonpublished abstracts, is available for lease. The computer products of other Federal agencies also are sold or leased.

Current summaries of new research reports and other specialized technical information in various categories of interest are published in weekly newsletters (Weekly Government Abstracts), for which a subject index is prepared annually. An all-inclusive biweekly journal (Government Reports Announcements and Index) is published for librarians, technical information specialists and those requiring all the summaries categorized in a single volume and accompanying index.

A standing order microfiche service (SRIM) automatically provides subscribers with the full texts of research reports selected to satisfy individual requirements.

Other services, such as the coordination, packaging and marketing of special technical information for organizations may be specially designed, anytime.

ABOUT ENGINEERING INDEX, INC.

For more than ninety years, Ei, a not-for-profit information service, has provided a data bank of abstracts, citations, and an index to the world's significant technical literature and conferences. It has played the leading role in furnishing the engineering, library, and informational communities with the latest knowledge available on prominent research and applications of technical ideas relevant to the field of engineering.

Ei's staff of editors (that is, engineers or individuals with technical backgrounds) read and analyze more than 2,000 technical publications in all principal languages each year. Included among these publications are the regular professional and industrial journals, as well as the proceedings, transactions, and special publications of engineering societies, scientific and technical associations, universities, laboratories and research institutions, governmental agencies, and industrial organizations. Also covered are papers of conferences, colloquiums and symposiums, monographs, seminars, reports, and books.

The editors systematically select, abstract, and index significant articles and make available a large, organized compilation (The Engineering Index data base) so that the individual seeking knowledge can scan terse, one paragraph summaries of documents to determine if there are original publication articles or conference proceedings that should be obtained for further information. During 1975, more than 85,000 Ei abstracts and citations were made available.

Ei places findings of the various disciplines side by side with extensive interconnecting indexing and cross-references. Some 12,000 subject headings and an index of 100,000 authors are used currently. The inquirer need only scan Ei's specialized index to find entries bearing upon his specific concern. The searcher is thereby exposed not only to the obvious areas of interest, but is automatically informed of developments in collateral fields ensuring that new and meaningful information is not overlooked or missed entirely.

Consideration has also been given to the frequency of issue, ease of handling, cost, and the varying needs of the user. Ei abstracts and citations that are in the Ei master data bank are available in annual and monthly updates in printed, computer-readable, and microform format.

Ei is also unique in that it is worldwide and transdisciplinary; it scrutinizes all disciplines of engineering for relevant information. This is of utmost importance when an inquiry in one discipline quite probably entails research from other disciplines.

To further enhance the value of Ei's services, copies of the majority of articles appearing in The Engineering Index data base may be obtained from the Engineering Societies Library at a moderate cost. ESL is a closely allied, but completely separate organization adjoining Ei at The United Engineering Center in New York City.

THE AMERICAN PETROLEUM INSTITUTE DATA BASE

The American Petroleum Institute is the major trade association of the U. S. petroleum industry. In 1954, it established a separate department, the Central Abstracting & Indexing Service, to serve the technical information needs of the industry.

This group has a staff of 20 chemists and engineers who locate information of importance to the energy industries by monitoring technical journals, about 200 trade magazines, as well as meeting paper preprints, proceedings and other documents. Coverage is world-wide; the publications monitored are in seven foreign languages as well as English. Subject matter includes technology of petroleum processing, fuels and lubricants, petro-chemicals, environmental matters, and nonpetroleum energy sources, etc.

For each document selected, an informative abstract is written and detailed index entries are recorded. Currently about 15,000 abstracts per year are prepared and distributed throughout the world. The index entries are used to create printed indexes and a computer-searchable file which dates back to 1964 and contains over 200,000 citations. Indexing is based on a carefully structured and strictly controlled thesaurus of terms. There is constant checking of the thesaurus to assure consistency and prevent ambiguity. As the nature of the information evolves, new terms are added. The indexing is extremely detailed, 35-40 terms per document on the average. Consequently, searches on the index files are very precise and result in reports that are complete and authoritative.

COAL GASIFICATION FOR ELECTRIC POWER GENERATION.
Lemezis, Sylvester; Archer, David H.
Westinghouse Electr Corp, Lester, Pa
DESCRIPTORS-*COAL, POWER GENERATION, FUELS,
CARD ALERT - 522, 524, 6L5
CODEN-COMBAF SOURCE- Combustion V 45 N 5 NOV L973 P 6-12

This new multiple fluidized-bed concept has the potential for overcoming the inherent limitations of their gasification processes and providing an economic gasification system for power plants. A wide variation in fuels including caking coals and high-ash coals can be used without costly and inefficient pretreatment. This flexibility will allow power plants to utilize local coal resources and minimize transportation costs. When scale-up procedures have been verified, a commercial-size gasifier plant will be constructed. 2 refs.

OPTIMIZE THE [REFINERY] EFFLUENT SYSTEM--3. ELECTROCHEMISTRY
OF (EMULSION/SUSPENSION) DESTABILIZATION.

A destabilization model is presented which suggests that phenomena related to increased effective ionic strength within the space occupied by an extended macroion chain can be used to explain the coagulation of predominantly negatively charged colloidal particles by anionic coagulants and other anomalous behavior of dissolved air flotation (DAF) pretreatment chemicals. The mechanisms of colloid destabilization, and especially the zeta potential and electrical double layer theories, are discussed with reference to refinery wastewater treatment. Graphs, tables, and diagrams.

NTIS RESEARCH REPORTS CITED IN NTISEARCHES ARE AVAILABLE IN THESE FORMATS

AVAILABILITY. NTIS products are available in one or more of the following forms:

PAPER COPY - Copies of the original report or reprint are furnished.

MICROFORMS - The size of the microfiche film sheet is 105 x 148.75mm (about 4 x 6 inches); microfilm can be 35mm or 16mm.

MAGNETIC TAPE - Tape can be seven track, 200, 556, or 800 bytes per inch (BPI), odd or even parity; or nine track, 800 or 1600 bpi, odd parity. Coding can be Bcd (Binary Coded Decimal) or Ebcdic (Extended Binary Coded Decimal Interchange code).

PUNCHED CARDS - Furnished as 80 column cards.

SRIM: AUTOMATIC MICROFICHE DISTRIBUTION OF RESEARCH REPORTS BY NTIS

SRIM (Selected Research in Microfiche) is an automatic biweekly service available from NTIS to help you expand your coverage of U. S. Government research and development at a cost within reach of a modest information budget. You limit your expense by receiving complete research reports (not just abstracts) in microfiche, but only in the subject areas you select -- and at only $0.55 for each SRIM microfiche title instead of the regular $3.00 price. And you get the reports in microfiche without having to track down a specific report and order it. For further details, telephone SRIM information (703) 557-4640 or write to NTIS.

ABOUT WGA

Weekly Government Abstracts comprise weekly newsletters in 26 categories, each carrying summaries of most unclassified federally funded research as it is completed and made available to the public. Abstracts of reports appear in as many categories as appropriate by means of a computerized cross-referencing system and do so within two or three weeks of their receipt by NTIS from the originating agencies. Generally, the technical report summaries have been prepared by the author. The last issue of the year is a subject index containing up to 10 cross references. The titles and annual subscription rates are:

	Domestic	Foreign
Administration	$ 45	$ 60
Agriculture and Food	45	60
Behavior and Society	45	60
Biomedical Technology & Engineering	45	60
Building Technology	45	60

HOW TO ORDER REPORTS CITED IN PUBLISHED SEARCHES COVERING THE NTIS DATA BASE

ORDERING. The form (or forms) in which a particular report is available, is indicated in the citation in the NTISearch: PC indicates Paper copy; MF or FICHE indicates Microfiche; MICROFILM (user must specify cartridge, reel, etc.); MAG TAPE indicates magnetic tape (user must specify mode and parity wanted). When options are offered, as with mag tape, be sure to include a note with your order indicating option desired. Legibility of paper copy and microform can vary. Be sure to indicate the number of copies wanted; and if your address is different from the mailing label on the order form, make all necessary corrections.

PAYMENT. Prepayment helps to expedite your order. You can use either an NTIS Deposit Account (request brochure NTIS-PR-33 for details on how to open a Deposit Account) or an American Express Card Account. If payment is sent, be sure your order and remittance are sent together. Please make checks payable in U.S. currency to National Technical Information Service. NTIS will ship your order and bill later, but a $5 surcharge per order (not per item) is added. A few reports announced by NTIS may be available from other sources at lower prices than NTIS charges, owing to subsidies from special funding. NTIS' operating costs are not subsidized and must be recovered from sales.

FOREIGN ORDERS. Customers outside of the North American continent should contact NTIS concerning prices or check a current NTIS price sheet.

NOTE: Please use order numbers to insure prompt and accurate fulfillment of your order. Prices quoted in this brochure apply only to items ordered with an order number.
